EDUCATION

McGill University

August 2022 – May 2026

Bachelor of Arts in Computer Science & Sociology, Minor in Computer Science

Montreal, QC

- **Activities & Societies:** Hack4Impact; CodeJam Hackathon Committee; Tutoring; McGill Design Consultancy; World Vision; McGill Association of North American Born Asians
- **Awards:** Entrance Scholarship; Tomlinson Engagement Award for Mentoring; David Harpp Undergraduate Award for Mentoring; Create4Good Case Competition (4th Place)

EXPERIENCE

McGill University

August 2025 – May 2026

Undergraduate Teaching Assistant

Montreal, QC

- Lead **weekly** interactive tutorials for an algorithms & data structures course in **Java** serving **400 students**, strengthening students' understanding of core algorithmic concepts and data structure
- Hosted **weekly** office hours, develop and present **weekly** tutorials, and answer technical questions on **Python** and data structures for **2** of McGill's largest CS courses with **900+ students**, boosting average assignment and midterm grades

Amazon

June 2025 – August 2025

Software Engineer Intern

Toronto, ON

- Designed and implemented a **Java** CLI to streamline large-scale service migration workflows across internal engineering teams, reducing migration timelines from **12 to 10** weeks for tools supporting **10,000+** engineers
- **Led** security review and identified an authentication bypass vulnerability in internal services, strengthening access controls and improving security for tools used by **2,000+** engineering teams
- Authored a low-level design document and presented technical tradeoffs to senior engineers, covering system architecture, security considerations, implementation risks, and resource constraints

McGill University

October 2024 – December 2024

Software Research Intern

Montreal, QC

- Authored a **10**-page literature review analyzing bias in AI-driven resume screening tools, synthesizing existing research to identify underlying causes of bias and propose technical and non-technical mitigation strategies

Business-Software.com

October 2023 – October 2024

Product Engineer Intern

Chicago, IL (Remote)

- Identified team pain points and opportunities to boost productivity, **spearheading** the development of an internal tool using **JavaScript** to streamline form completion, increasing form submissions by **100%** and receiving positive feedback
- Leveraged **Chrome Extension APIs** to automate repetitive tasks, reducing time to input form data by **80%**

PROJECTS

ConUAlerts | [GitHub](#)

- Developed a scalable web application notifying **150+** students when spots open in their desired classes via SMS in a **team**, using **React**, **TypeScript**, **Go**, **PostgreSQL**, **MongoDB**, **Docker**, **Twilio**, and **Microsoft Azure**

myBookings | [GitHub](#)

- Engineered a booking web app tool with user authentication for **200+** McGill students and staff in a **team** using **TypeScript**, **React**, **Node**, **Express**, **PostgreSQL**, **Microsoft Azure**, and **Figma**

LEADERSHIP EXPERIENCE

Hack4Impact McGill

September 2022 – May 2026

Executive Director

- **Spearhead** a team of **50+** members developing software solutions for socially responsible groups, such as Greenpeace, and **oversaw 3** product and engineering teams iterating on features, ensuring alignment with user requirements
- Designed a financial and client tracking platform for Resilience Montreal, improving financial and data management

CodeJam Hackathon Committee

Jan. 2023 – July 2026

Design Lead

- **Led** an engineering team and a design team in collaborative development of a hacker dashboard, streamlining **350+** participants' experience

TECHNICAL SKILLS

Programming Languages: Python, Java, TypeScript/JavaScript, C, Haskell, SQL, Bash, R

Frameworks & Tools: React, Next, Node, JUnit, Git, HTML/CSS, Visual Studio Code, Linux/Unix, Stata, Amazon Web Services, Adobe Creative Cloud, Figma, Claude Code/Design
